

Kimind Consulting, Paris, France

An international digital consulting company Kimind Consulting hired Codex Software to develop ExamGeneral – a global eLearning platform designed to provide professional examination and testing services for big educational institutions, teaching professionals and their students.

#1: DEVELOPMENT OF A STABLE & SECURE BACK-END

Solution: a Zend Framework / Amazon AWS server-side data processing system

Outcome: a secure and stable software, able to handle big workloads

#2: CREATING ROLE-BASED FUNCTIONALITY

Solution: incorporation of means to perform specific functions for all system users (e.g. for teachers – schedule exams, set question order and shuffling for each exam, leave comments, etc.;).

Outcome: several sets of software tools designed for platform administrators, educational facilities, teaching professionals and students.

#3: MAKING THE SYSTEM EASY-TO-USE FOR EVERYONE

Solution: implementation of modern UX best practices.

Outcome: dashboard-based intuitive user interface that makes ExamGeneral accessible even to a novice.
